

[From Ms. Moumita Gangopadhyay from Bose Institute, Calcutta: Her Impression about the Biotech Conference.]

Sir,

I arrived from Dhaka with full of scientific experience and pleasure. The faculty members are very knowledgeable as well as easy accessible. Their hospitality is so much good that I cannot explain it in words; it's just like my home town. We enjoyed trips to famous places of Dhaka, especially. I shall never forget *Poila Baisakh* in Dhaka town. It's amazing and a life-time experience. University is very homely and I think the main resource is the students; they are very good and the teacher-student interactions are very fine here. Faculties and students together fight for scientific achievement.

I personally met Dr Zeba Islam; she is a nice teacher and her lab is so much well equipped and self-contained, just like any Western world Lab. I won second best poster award .

Thanking you,

Sincerely,

MOUMITA
